

PEACE RIVER REGIONAL DISTRICT

July 19, 2023

Attention: Homeowners along Lakeshore Drive

Construction Activities in Charlie Lake

Big League Utilities (BLU) and McElhanney Ltd. has been contracted by the Peace River Regional District (PRRD) to design and install a new low-pressure sewer line along Lakeshore Drive. This new sewer line will improve service to the homeowners in this area and improve operation of the system. In addition to the mainline the PRRD will here will be locating and repairing valves in the surrounding area of construction. This may result in BLU or PRRD operators needing access to your yard or driveway.

Repairs and construction are planned to take place from July 26 to August 3, 2023. During this time there may be temporary impacts to properties. Septic tanks on properties close to repair activities may not be able to pump for a few hours while repairs are being conducted. A map of potentially affected properties is attached for your reference. This map tells you where construction activities will be taking place, what homes may be directly impacted during construction activities, and when impacts to your sewer connection could be experienced.

If impacts are expected, BLU will knock on doors of affected properties the day of construction. BLU will work efficiently and quickly to minimize potential impacts. It is recommended that homeowners get their septic tanks cleaned prior to construction so more storage capacity is available in individual septic tanks to mitigate against any potential impacts.

Please contact the PRRD Environmental Services Department at 250-784-3200, or environmental.services@prrd.bc.ca if you have questions or concerns.

This project is made possible through Gas Tax Grant Funding from the Province of BC and the Government of Canada.

Sincerely,

Abbi Kau
